

# CADE SARKIN

Brooklyn, NY 11249 | (479) 684-9353 | sarkincade@gmail.com | cadesarkin.com

## PROFESSIONAL SUMMARY

Engineer with 3+ years shipping production TypeScript, Java, and Python across high-traffic applications and developer tooling. Currently building SDK generators, agent automations, CLI features, and API docs infrastructure at Fern for enterprise API companies. Owns features end to end, from customer conversation to shipped release.

## TECHNICAL SKILLS

**Languages:** TypeScript, JavaScript, Java, Python, Go, C#, C++, SQL

**SDK Codegen:** Idiomatic client generation across TypeScript, Python, Go, Java, C#, PHP, Ruby, Swift, Rust

**Frameworks:** React, Next.js, Node.js, Angular, Spring Boot, GraphQL, REST APIs, Three.js

**Infrastructure:** AWS, Cloudflare, Vercel, Docker, PostgreSQL, MongoDB, PostHog, CI/CD, Git/GitHub

**Developer Tooling:** OpenAPI/Swagger, CLI development, webhooks, OAuth, MCP, npm/PyPI/Maven publishing

## PROFESSIONAL EXPERIENCE

### Fern

Jun 2026 – Present

*Engineer — SDKs, CLI & Platform*

- Built Fern Agent Automations, giving 100+ enterprise customers automated analysis and maintenance of their docs — one prompt plus a cron expression schedules recurring agent runs, and a one-time OAuth consent means every edit and PR carries the user's own permissions, not a bot's.
- Ran automation doc edits as durable background jobs that wake the agent when they land, so it reports the resulting PR and notifies the user over email or Slack.
- Ship features across Fern's SDK generators for nine languages — auto-generated idempotency keys, user-agent headers, webhook signature verification — raising the security and reliability baseline of every generated SDK.
- Extended the Fern CLI with dual authorization and package identity customization, giving customers control over registry credentials and published package naming.
- Shipped org-scoped data retention in the dashboard — deletion policies and on-demand purging for search queries, Ask AI conversations, preview sites, and MCP data previously kept indefinitely — unblocking enterprise compliance.
- Added RSS subscriptions to documentation-site blogs, letting readers follow new posts from any feed reader.
- Led enterprise migrations onto Fern — Sigma's 1,500-page move off ReadMe, with custom components preserving their structure and branding, and Mailchimp's full docs, SDK, and CLI migration across nine languages.
- Built dozens of custom API Docs and SDK demos for multi-billion-dollar prospects, turning each company's API spec into a working proof of concept for enterprise sales cycles.
- Own bug triage across the SDK generators, CLI, and dashboard — reproducing customer-reported issues, identifying root cause, and shipping fixes into the affected language generators.

### J.B. Hunt Transport Services, Inc.

Sep 2024 – Mar 2026

*Software Engineer II – Full-Stack*

- Architected and deployed microservices for the customer booking workflow in TypeScript and Java, enabling guest checkout and card payments for the first time and increasing booking conversion 35%.
- Spearheaded conversion from session storage to GraphQL, eliminating cross-tab session bugs, updating 1,000+ tests, and improving data fetch speeds by approximately 50%.
- Led Angular v12 to v18 modernization, restoring full test coverage and cutting page load times by 2.5 seconds.

### J.B. Hunt Transport Services, Inc.

Jun 2023 – Sep 2024

*Software Engineer I – Java/Full-Stack*

- Developed and maintained customer-facing microservices handling 100,000+ daily requests for booking, tracking, and payment of shipments across North America using Java and Spring Boot.
- Mitigated 300+ CVEs and upgraded 20+ microservices to Spring Boot 3.x, hardening enterprise security posture.

### J.B. Hunt Transport Services, Inc. — Engineering Intern, Team Lead

Summer 2021, 2022

- Led a team of engineers in Agile sprints and presented to 200+ attendees including the CIO; delivered 4x expected output on data-grid conversions.

## PROJECTS & SIDE WORK

### AD VANCE – Designer Clothing Brand

March 2021 – Present

*Co-Owner & Sole Developer | vance-ad.com*

- Built and own a full-stack e-commerce platform (React, Next.js, Vercel) with a custom Stripe preorder checkout — payment holds, order queuing, fulfillment tracking — plus a PostgreSQL admin dashboard and CI/CD.

**Additional Projects:** Mozaik — AI-generated interactive dashboards from CSV data; SurveyAI — land survey workflow app (React/Next.js + Python); Dreamhouse — site for a NYC design firm.

## EDUCATION

### The University of Kansas

Lawrence, KS – May 2023

*B.S. Computer Science and Engineering | SELF Engineering Leadership Fellow (1 of 27 from 500)*
